

Knorr Bremse Technology Centre

securistyle⁷

Brief

The project architects, ABH Architekturburo Heese, designed the building based on a remit that combined contemporary design with traditional Arab culture.

Location

Munich, Germany

Product

Parallel Plus

Architect

ABH
Architekturburo
Heese GmbH

Client

Knorr Bremse
AG

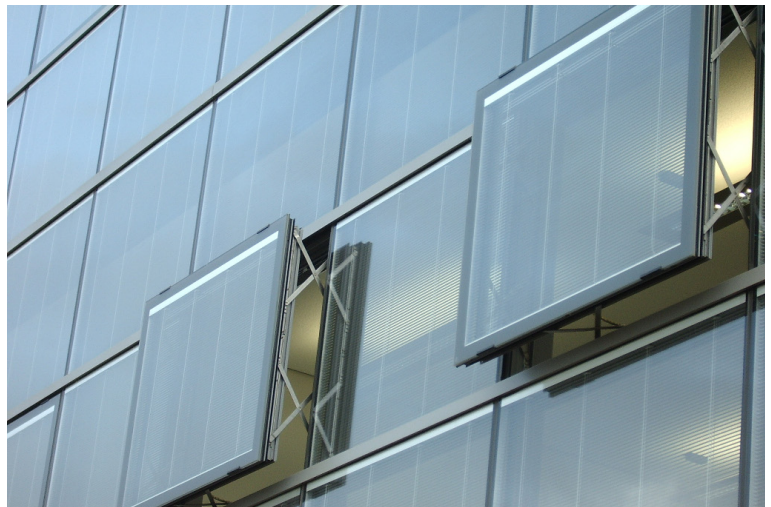

Details

Established in 1905, Knorr Bremse became the largest brake manufacturer for rail vehicles in Europe. Designed by ABH-Architekturburo Heese, the Knorr Bremse Technology Centre in Munich was completed in 2004 and features motorised blinds within the glazing.

The technology centre contains offices and research areas, as well as training, seminar and conference rooms. A fully glazed facade ensures the building enjoys plenty of natural light and the glass curtain walling within the building provides a good all round view of the building inside and out.

As with the other heavy duty hinges developed by Securistyle, the Parallel Plus hinge is manufactured from high grade 304 austenitic stainless steel which

provides increased strength and guaranteed long-term resistance to corrosion. It is also fully supported by a 12 year guarantee.
